PROFILE

Skilled full stack developer specialised in designing and managing complex multi-microservice solutions following Agile methodologies. Following a task lifecycle from design and estimation to production deployment and support, I am experienced creating flexible and scalable microservices and complex frontend Single Page Applications. I actively focus on new frontend and backend technologies, event sourcing and business analysis.

EXPERIENCE

FULL STACK DEVELOPER, ESOLUTIONS (Bucharest, RO)

NOV 2015 - PRES (5 YRS)

- Worked in teams of 3 to 20+ that designed and implemented backend platforms using Java (Spring), SQL/NoSQL (PostgreSQL, MongoDB, Redis) and message queues (Kafka) which expose REST APIs for mobile and web clients.
- Developed User Interfaces as Single Page Applications for internal and client projects using HTML/SASS/JavaScript (Angular, jQuery).
- Delivered an e-commerce platform for a leading retailer that is now serving 500+ orders/day. Participated in stakeholder discussions, developed, tested, deployed and offered support for the application. Served customisations for 3 online shops.
- Tech Lead for a custom warehouse management system integrated in the e-commerce platform architecture. Advised and developed key components of the platform like stock management, order preparations, shipping, returns and reporting. The system is now deployed in 3 locations, with 50+ employees working in 3 shifts.
- Technical Product Owner for internal projects aiming to ensure business automation for online and offline retailers. The platform consists in 5+ applications designed using an Event Sourcing approach. Gathered business insights, consulted with field specialists and created user stories for the development team.
- Provided 3 training courses for groups of 15-20 interns and juniors on JavaScript and Angular, leading to positive reviews and full-time conversion. Gave 5 presentations on Angular, AngularJS, RXJS, Gulp to co-workers, boosting the ramp-up process.

WEB DEVELOPER INTERN, CODE11 (Bucharest, RO)

JUL 2015 - SEP 2015 (3 MO)

- Part of a team of interns that implemented web applications from scratch using Node.js and AngularJS
- Created an application that provides a common space for developers to estimate user stories and integrates with JIRA. Delivered a product with most features implemented: Jira integration, online/offline estimation, presentation mode etc.
- Created a mind map application for brainstorming ideas and saving them in cloud with a high emphasis on friendly UI. Delivered a MVP with key features in place: user profile, mind map history, export to PDF etc.

EDUCATION

BS COMPUTER SCIENCE, University of Bucharest (Bucharest, RO)

2013 - 2016

SKILLS

FRONTEND	JavaScript, TypeScript, Angular, React, AngularJS, jQuery, HTML, SASS
BACKEND	Java (Spring), SQL/NoSQL (PostgreSQL, MongoDB, Redis), Spock, Node.js, Kafka, Docker
TOOLS	Unix, Git, Atlassian Suite
OTHER	Agile (SCRUM), Estimations, CI/CD, TDD, Teamwork, Training, Public Speaking

TRAININGS

DEVOXX UK (London, UK)	MAY 2019
(D)DDD AND CQ(R)S WORKSHOP, Devovx UK (London, UK)	MAY 2019
JSCONF (Berlin, DE)	JUN 2018
ANGULAR CONNECT (London, UK)	NOV 2017
ULTIMATE WORKSHOP - NGRX, Angular Connect (London, UK)	NOV 2017
ANGULAR COURSE, eSolutions Academy (Bucharest, RO)	JUN 2017
SOLR COURSE, eSolutions Academy (Bucharest, RO)	FEB 2017

VOLUNTEERING

DIGITAL PARTICIPATION CAMP, Erasmus+ (Munster, DE)	JUL 2016
PROJECTS DEPARTMENT, ASMI (Bucharest, RO)	NOV 2014 - DEC 2015
